MADE IN USA

LOADING DOCK BACKING LIGHT KIT (LDBLK)

Every Loading Dock Should be Lighted for Safety!

EFFECTIVE

The Loading Dock Backing Light Kit (LDBLK) is a LED lighting system that provides a visible path for backing safely to the loading dock. A difference in lighting can greatly affect drivers, especially when the lighting changes drastically. Installing the LDBLK enhances your facility's safety and restores confidence in drivers.

DURABLE

Our **super-tough IP68-rated** LED light strips, marine-grade wiring, and stainless steel hardware ensure long life even in the harshest conditions. Can endure temperatures from as low as -60°F up to 165°F. Our **3-year warranty** is the best in the industry!

CUSTOMIZABLE

Our patented LED Controller is the Brain of the System. It was designed & built in-house by our highly-skilled Engineering Team who stands ready to help craft a **custom-designed solution** that best suits your application's needs.

SUPPORTED

Our **unique cutting-edge technology** makes your old or new doors safer than ever. Field programming of our patented LED Controller is quick and easy. Our **outstanding technical support staff** ensure every project is a success.
